# bev·el

**bev·el** (bĕv'əl) *noun*

1. The angle or inclination of a line or surface that meets another at any angle but 90°.
2. Two rules joined together as adjustable arms used to measure or draw angles of any size or to fix a surface at an angle. In this sense, also called *bevel square*.

*verb*

**bev·eled** or **bev·elled** **bev·el·ing** or **bev·el·ling** **bev·els** or **bev·els** *verb, transitive*

To cut at an inclination that forms an angle other than a right angle: *beveled the edges of the table*.

*verb, intransitive*

To be inclined; slant.

[Possibly from Old French *\*bevel*, perhaps from *baif*, open-mouthed, from *baer*, to gape, from Vulgar Latin *\*badāre*.]
